

\$ ywc -agent-toolkit

Design System

Terminal-native visual language for the Claude Code & Codex toolkit landing page. Warm near-black canvas, monospace-forward, amber-phosphor accent, pipeline-state semantics. Dark by deliberate default.

IBM Plex Mono

Space Grotesk

amber #f5a623

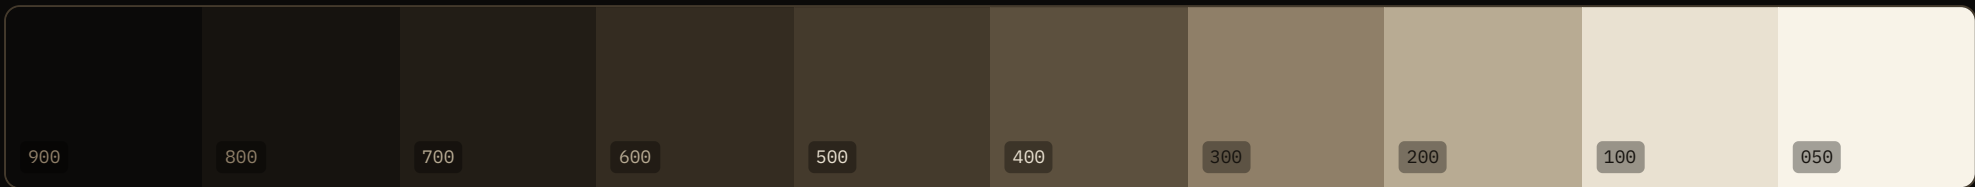

cyan #45c7ce

5 locales · en·ja·ko·zh·es

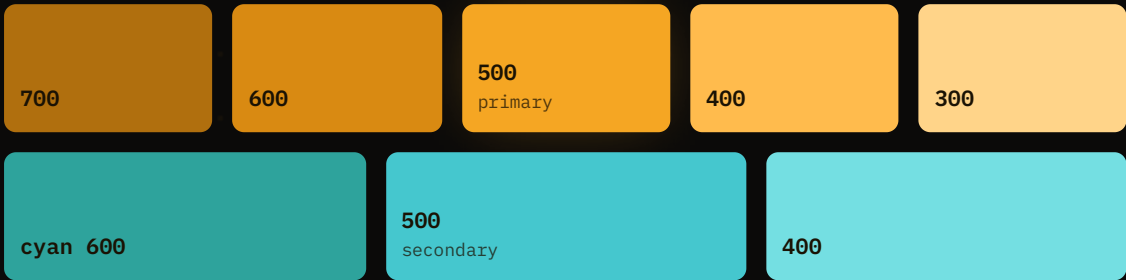

The terminal canvas

Warm near-black — never blue-black. One amber primary, one cyan secondary, pipeline-state semantics as glowing dots.

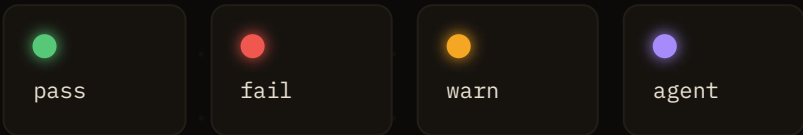

Neutral ink ramp · --ink-900 → --ink-050

Amber phosphor (primary) · cyan (secondary)

Pipeline / review states

Semantic aliases — reference these, not the raw ramp

 --bg	 --surface	 ink-800
 --text	 --accent	 amber-500
 --border	 --link / --lane-codex	 cyan-500

Three roles

Display (Space Grotesk) · Body (IBM Plex Sans) · Mono (IBM Plex Mono, the signature). CJK via Noto Sans JP/KR/SC on every stack.

--font-display

Ship faster.

--font-sans

Turn a rough idea into a merged PR — 日本語 · 한국어 · 中文.

--font-mono

\$ bash scripts/install.sh --all

--text-label

STATUS-LINE EYEBROW

Fluid scale · clamp()

×

What is ywc-agent-toolkit?

A collection of skills for Claude Code and Codex that automates the full development workflow — planning, spec, code-gen, review, and release.

+

What are the install requirements?

+

How does it affect cost and tokens?

Three-column documentation

Top bar · skill-nav sidebar · prose · on-this-page TOC. Mono nav, amber active states, copyable command blocks. Same tokens as the product.

Overview

When to use

Usage

Examples

Terminal-literate, no gloss

Address the reader as "you". Sentence case; UPPERCASE mono only for eyebrows.
Skill names lowercase-mono. No emoji. "41 skills" is safe; agent counts differ (12
CC / 7 Codex) so the hero says "expert agents".

✓ DO

"A collection of 41 skills and expert agents for Claude Code and Codex —
from planning and spec writing to code generation, review, and release."

"Plugin-marketplace and Codex-plugin installation have no prerequisites."

plan → spec → code → review → release

✗ DON'T

"🚀 The BEST AI toolkit that will 10x your workflow!!!"

"41 skills and 12 agents for Claude Code and Codex" (agent count is tool-
specific — wrong in the hero)

Emoji, exclamation marks, invented metrics, or an invented logo.
